

Essential Rapid REVIVE! Talking Points

Explain what happens in an overdose and the signs to recognize one occurring.

- Unconscious
- Breathing problems
- Turning, blue, gray, or ashen

What to do

1. Call 911
2. Give naloxone
3. Rescue breathing
4. Place in Recovery Position
5. Call 911
6. Give naloxone and stay with them

Describe how naloxone works and how long:

- Only works on opioids, give an overview of different opioids
- Will not harm someone if it's not an overdose
